Volume 27 Number 1 21 January 2005

RESEARCH REPORTS

Research and trends in social science education from 1998 to 2002: a content analysis of publication in selected journals
Chin-Chung Tsai and Meichun Lydia Wen 3

Developing deeper understandings of nature of science: the impact of a philosophy of science course on preservice science teachers' views and instructional planning
Fouad Abd-El-Khalick 15

Development and application of a rubric for analysis of novice students' laboratory flow diagrams
Bette Davidowitz, Marissa Rollnick and Cynthia Fakudze 43

Physics teachers' knowledge and beliefs regarding girls' low participation rates in advanced physics classes
Anat Zohar and Boaz Bronshtein 61

Exploring Turkish upper primary level pupils' understanding of digestion
Yilmaz Cakici 79

Solving problems in genetics
Mercedes Martinez Aznar and Teresa Ibáñez Oreajo 101

Volume 27 Number 2 4 February 2005

Special Issue: Science Education in New Zealand
Guest Editors: Alister Jones and Robyn Baker

Curriculum, learning and effective pedagogy in science education for New Zealand: introduction to special issue
Alister Jones and Robyn Baker 131

How can international studies such as TIMSS and PISA be used to inform practice, policy and future research in science education in New Zealand?
Robyn Baker and Alister Jones 145

Pedagogies developed in the Learning in Science projects and related theses
Beverley Bell 159

The role of models/and analogies in science education: implications from research
Richard K. Coll, Bev France and Ian Taylor 183

Student commentary on classroom assessment in science: a sociocultural interpretation
Bronwen Cowie 199

Is 'doing science' in New Zealand classrooms an expression of scientific inquiry?
Mavis Haigh, Bev France and Mike Forret 215

Locating the global: culture, language and science education for indigenous students
Elizabeth McKinley 227

Teaching the 'nature of science': modest adaptations or radical reconceptions?
Rosemary Hipkins, Miles Barker and Rachel Bolstad 243

Volume 27 Number 3 25 February 2005

RESEARCH PAPERS

Examining young children's conceptual change process in floating and sinking from a social constructivist perspective
Sari Havu-Nuutinen 259

Studying students' attitudes towards science from a cultural perspective but with a quantitative methodology: border crossing into the physics classroom
Lars B. Krogh and Poul V. Thomsen 281

The conceptions of chemistry teachers about teaching and learning in the context of a curriculum innovation
Jan H. van Driel, Astrid M. W. Bulte and Nico Verloop 303

The importance of involving high-school chemistry teachers in the process of defining the operational meaning of 'chemical literacy'
Yael Shwartz, Ruth Ben-Zvi and Avi Hofstein 323

Supporting teachers in making innovative changes in the use of computer-aided practical work to support concept development in physics education
Roy Barton 345

The development of the concept of 'matter': a cross-age study of how children describe materials
Dušan Krnel, Rod Watson and Saša A. Glažer 367

Volume 27 Number 4 18 March 2005

RESEARCH REPORTS

Systematic reviews of research in science education: rigour or rigidity?
Judith Bennett, Fred Lubben, Sylvia Hogarth and Bob Campbell 387

The rewards and challenges of teaching innovation in university physics: 4 years' reflection
Wheijen Chang 407

Science learning through Scouting: an understudied context for informal science education
Ruth Jarman 427

Solving physics problems with the help of computer-assisted instruction
Henk Pol, Egbert Harskamp and Cor Suhre 451

The formation of science choices in secondary school
Anna Cleaves 471

About being pure and natural: understandings of pre-service primary teachers
David Lake 487

Book Review 507

Volume 27 Number 5 15 April 2005

RESEARCH REPORTS

The role of visualization in learning from computer-based images
Michael D. Piburn, Stephen J. Reynolds, Carla McAuliffe, Debra E. Leedy, James P. Birk and Julia K. Johnson 513

The visual core of science: definition and applications to education
James H. Mathewson 529

The development of science teachers' knowledge on models and modelling: promoting, characterizing, and understanding the process
Rosária Justi and Jan van Driel 549

Cultural learning environment of upper secondary science students
Harkirat S. Dhindsa 575

The development and validation of a primary science curriculum delivery evaluation questionnaire
Brian Lewthwaite and Darrell Fisher 593

Identity and genre literacy in high-school students' experimental reports
Erik Knain 607

Taiwanese science and life technology curriculum standards and earth systems education
Chun-Yen Chang 625

Volume 27 Number 6 16 May 2005

RESEARCH REPORTS

The development of a questionnaire to measure students' motivation towards science learning
Hsiao-Lin Tuan, Chi-Chin Chin and Shyang-Horng Shieh 639

'Loveable' mammals and 'lifeless' plants: how children's interest in common local organisms can be enhanced through observation of nature
Petra Lindemann-Matthies 655

The impact of a cryogenics-based enrichment programme on attitude towards science and the learning of science concepts
Imelda Caleon and R. Subramaniam 679

Affordances of ICT in science learning: implications for an integrated pedagogy
Mary E. Webb 705

Encouraging conceptual change: the use of bridging analogies in the teaching of action–reaction forces and the 'at rest' condition in physics
Tom Bryce and Kenneth MacMillan 737

Volume 27 Number 7 3 June 2005

RESEARCH REPORTS

The importance of teacher interpersonal behaviour for student attitudes in Brunei primary science classes
Perry den Brok, Darrell Fisher and Rowena Scott 765

Improving progression and continuity from primary to secondary science: Pupils' reactions to bridging work
Martin Braund and Vicky Hames 781

Characterizing children's spontaneous interests in science and technology
Ayelet Baram-Tsabari and Anat Yarden 803

Do Spanish secondary school teachers really value different sorts of procedural skills?
Cristina Martínez-Losada and Susana García-Barros 827

Design-based science and real-world problem-solving
David Fortus, Joseph Krajcik, Ralph Charles Dershimer, Ronald W. Marx and Rachel Mamlok-Naaman 855

Book Reviews 881

Volume 27 Number 8 17 June 2005

RESEARCH REPORTS

Concept formation in environmental education: 14-year-olds' work on the intensified greenhouse effect and the depletion of the ozone layer
Karolina Österlind 891

High-school students' reasoning while constructing plant growth models in a computer-supported educational environment
Marida Ergazaki, Vassilis Komis and Vassiliki Zogza 909

Teacher–pupil interaction: A study of hidden beliefs in conclusion phases
Ludovic Morge 935

The effects of metacognitive instruction embedded within an asynchronous learning network on scientific inquiry skills
Michal Zion, Tova Michalsky and Zemira R. Mevarech 957

The effect of integrated course and faculty development: Experiences of a university chemistry department in the Philippines
Marilou R. Gallos, Euwe van den Berg and David Treagust 985

Book Reviews 1007

Volume 27 Number 9 15 July 2005

RESEARCH REPORTS

The dilemma of case-based teaching and learning in science in Hong Kong: Students need it, want it, but may not value it
Carmel McNaught, W.M. lau, Paul Lam, Mark Y.Y. Hui and Peter C.T. Au 1017

The influence of students' cognitive and motivational variables in respect of cognitive conflict and conceptual change
Sukjin Kang, Lawrence C. Scharmann, Taehee Noh and Hanjoong Koh 1037

I didn't know oxygen could boil! What preservice and inservice elementary teachers' answers to 'simple' science questions reveals about their subject matter knowledge
Diana C. Rice 1059

Chemistry Is in the News: Taxonomy of authentic news media-based learning activities
Rainer E. Glaser and Kathleen M. Carson 1083

Scientific knowledge and attitude change: The impact of a citizen science project
Dominique Brossard, Bruce Lewenstein and Rick Bonney 1099

Teaching for quality learning in chemistry
José J.C. Teixeira-Dias, Helena Predrosa de Jesus, Francislê Neri de Souza and Mike Watts 1123

Book Review 1139

Volume 27 Number 10 19 August 2005

RESEARCH REPORTS

Effectiveness of a Constructivist Approach to Science Instruction for Prospective Elementary Teachers
Ling L. Liang and Dorothy L. Gabel 1143

From Global Sustainability to Inclusive Education: Understanding urban children's ideas about the food system
Angela Calabrese Barton, Pamela D. Koch, Isobel R. Contento and Sumi Hagiwara 1163

Learning Physics in Context: A study of student learning about electricity and magnetism
Noah Finkelstein 1187

Assessment of Practical Work in Ireland: A critique
P. S. C. Matthews and P. J. McKenna 1211

Response to 'Assessment of Practical Work in Ireland: A critique' by P. Matthews and P. McKenna
Declan Kennedy and Judith Bennett 1225

Student-Teachers' Ability to Read Nature: Reflections on their own learning in ecology
Ola Magntorn and Gustav Helldén 1229

Students' Expectations of Teaching in Undergraduate Physics
Delia Marshall and Cedric Linder 1255

Volume 27 Number 11 16 September 2005

RESEARCH REPORTS

Using Static and Dynamic Visuals to Represent Chemical Change at Molecular Level
Dilek Ardac and Sevil Akaygun 1269

Do Particle Ideas Help or Hinder Pupils' Understanding of Phenomena?
George Papageorgiou and Philip Johnson 1299

Potential Values of Incorporating a Multiple-Choice Question Contruction in Physics Experimentation Instruction
Fu-Yun Yu and Yu-Hsin Liu 1319

How are the Concepts and Theories of Acid–Base Reactions Presented? Chemistry in Textbooks and as Presented by Teachers
Carlos Furió-Más, María Luisa Calatayud, Jenaro Guisasola and Cristina Furió-Gómez 1337

On Food, Farming and Land Management: Towards a research agenda to reconnect urban and rural lives
Justin Dillon, Mark Rickinson, Dawn Sanders and Kelly Teamey 1359

The Relationship Between Attendance in Student-centred Physics Tutorials and Performance in University Examinations
Manjula D. Sharma, Alberto Mendez and John O'Byrne 1375

Book Review 1391

Volume 27 Number 12 7 October 2005

RESEARCH REPORTS

Students' Views and Attitudes Towards the Communication Code Used in Press Articles About Science
Krystallia Halkia and Dimitris Mantzouridis 1395

Case-based Long-term Professional Development of Science Teachers
Yehudit J. Dori and Orit Herscovitz 1413

Primary Trainee Teachers' Learning and Teaching about Light: Some pedagogic implications for initial teacher training
Dave S. Heywood 1447

Rationale and Approaches for Embedding Scientific Literacy into the New Junior Secondary School Chemistry Curriculum in the People's Republic of China
Bing Wei and Gregory P. Thomas 1477

Solving Problems in Genetics II: Conceptual restructuring
Teresa Ibáñez Orcajo and Mercedes Martínez Aznar 1495

Volume 27 Number 13 28 October 2005

RESEARCH REPORTS

Context-based and Conventional Approaches to Teaching Chemistry: Comparing teachers' views
Judith Bennett, Cornelia Gräsel, Ilka Parchmann and David Waddington 1521

First-year Pre-service Tachers in Taiwan—Do they enter the teacher program with satisfactory scientific literacy and attitudes toward science?
Chi-Chin Chin 1549

Learning Introductory Quantum Physics: Sensori-motor experiences and mental models
Jiun-Liang Ke, Martin Monk and Richard Duschl 1571

Assessing Teachers' Pedagogical Knowledge in the Context of Teaching Higher-order Thinking
Anat Zohar and Noa Schwartzer 1595

Developing a Multi-dimensional Instrument for Assessing Students' Epistemological Views toward Science
Chin-Chung Tsai and Shiang-Yao Liu 1621

Book Review 1639

Volume 27 Number 14 18 November 2005

RESEARCH REPORTS

The Teaching of Physics and Cartoons: Can they be interrelated in secondary education?
F. Javier Perales-Palacios and José M. Vilchez-González 1647

Student-teachers' Learning Outcomes during Science Subject Matter Courses
Margareta Ekborg 1671

The Difficult Process of Scientific Modelling: An analysis of novices' reasoning during computer-based modelling
Patrick H.M. Sins, Elwin R. Savelsbergh and Wouter R. van Joolingen 1695

Identifying Mentoring Practices for Developing Effective Primary Science Teaching
Peter Hudson 1723

The Impact of Interactive Computer Simulations on the Nature and Quality of Postgraduate Science Teachers' Explanations in Physics
Zacharias C. Zacharia 1741

Book Review 1769

Volume 27 Number 15 16 December 2005

RESEARCH REPORTS

Social Metaphorical Mapping of the Concept of Force "CHI-KA-RA" in Japanese
Mariko Suzuki 1773

The Role of Everyday Contexts in Learner-centred Teaching: The practice in Namibian secondary schools
Choshi Kasanda, Fred Lubben, Noah Gaoseb, Utji Kandjeo-Marenga, Hileni Kapenda and Bob Campbell 1805

Discursive Roles of the Teacher during Class Sessions for Students Presenting their Science Investigations
Phil Seok Oh 1825

A Motivational View of Constructivist-informed Teaching
David Palmer 1853

Book Review 1883

Erratum 1887

Contents of Volume 27, 2005 1889
